THE OLD SCHOOL MASTER.

He Met an Old Time Pupil, And The Unexpected Happened.

The middle-aged man, who was
noticing a street sign on the out-
side wall of the village, was ac-
claimed by a young fellow of frac-
descent.

"Hi, Mr. Rustin," asked the
lad.

"You used to know the Kings-
dale bridge when you were ten or
better," said the stranger.

"Did I?"

"Do you remember a boy named
Tip that used to school to you about that time?"

"Yes, I think I recall that."--
...Well, I generally do.

"Do you recall the time I stuck a
lead gate in the path when John
Merritt was standing to rest on it
and you ran over it and didn't
make me a little scolding?"

"Oh, yes, I remember that."

...I'm afraid I don't.

...Well, I generally do.

"That public meeting is to be
held for any purpose, you want
the lead gate to give it due pub-
icity."

...When they were trying to
build up churches or schools, the
lead gate was used to give them
good, strong puffs.

...If there is a battle for right
and wrong, and was very proud of
his charge, he expected to
make a big time among the
with a splendid victory. No

community.

...Yet they cheerfully pay
subscriptions annually in advance

Chattanooga.

esting facts concerning its history

bought a boy with a bear skin
and gave me a little the best
whipping.

...On one a time a man made
a large collection of firearms of all
countries and nations, and was very proud of
his charge.

...He showed them to his friends, and among
his visitors that there was a par-
ker in handling them for
they could not be
noted.

...The story of his collection
related the case of an interpreting
teacher in the history of his
delight in the night and
depressed him of his
possessions.

...Moral: The fact of firearms
being unloaded is not guarantee
that they will not go off.

This monster would sink any vessel and lying on its side it would shield a full company of soldiers. It has taken four years to get enough above the roof for a chimney for a single discharge. Stood on its breast beside a three story building it would project far enough. It uses 1,000 pounds of powder in the harbor. When mounted it will land a projectile weighing over a hundred pounds on shore.

Consumption is a human weed flourishing in weak lands. Like other weeds it's easily destroyed while young; when old, sometimes life possible.

Scotch Emulsion is Scott's Emulsion. Soft perk is good land and it is very hard to digest.

The time to treat consumption is when you begin trying to be free from it, as soon as you can.

Don't wait until you can't destroy it any longer. Begin with the first thought to take Scott's Emulsion. It isn't really consumption so much the better, you will soon be free in time and will be regularly in your treatment you will win.

Scott's Emulsion fresh air, rest you can eat, you can do all that's in your treatment and that's the best treatment.

THE PROGRESSIVE TOWNS.

They Are Inhabited by the Right Kind of Citizens.

Every town has the w rong and the right kind of citizens. If the farmer is the most respected in the town in which they live it is not because of the right kind of citizens, but because of the wrong kind of citizens. The right kind of citizens is the man who wants to see his town improve and grow, and is in the main he who does not look back at the excitement for in every instance he spends his money at home and encourages home enterprises. The right kind of citizens does not grovel about high taxes, because he has some means now to pay taxes, and knows that he has a high taxes to pay. He is a man who has a high taxes to pay, and knows that he has a right to do so.
