J. E. MURPHY

As returned from New York, where he spent two weeks in selecting the most tasty line of fine
Dry Goods and Fancy Goods
it has ever been his pleasure to show. Why not buy new nice stylish goods when you can get them as low as others ask for

the city council allowing the bars to remain. It was not a popular move, but it was done for the public welfare.

The ordinance recently passed by the council will certainly do right for there will be less drunks and rowdies on the streets.

Inches long. There was no apparent reason for the reptile being there, but it did not seem to be unduly frightened. It was seen close to the town.

The_tpline trial has been frequently adjourned and will probably be continued for another day. The proceedings are slow, but the judge is sure to do justice to both parties.

The honorable D. L. Clark, one of the members of the General Assembly of Georgia, arrived in Atlanta this week, accompanied by his staff. Governor Mclintire of Colorado, Governor Woodberry of New York, Governor McKinley of Ohio, and Governor Merriam of Pennsylvania, have all arrived for the session.

A young man named Green, who has been trying to get a job at the office, has been working there for several months. He is a capable man, and it is hoped that he will soon be made a permanent employee.

The liberty bell will arrive in Dahlonega early next week. It is a grand success and shows that we have noticed. He kept it up with his staff. The Hull & Sons Co. paid our town a pleasant visit last week.

The fourth and last Quarterly Conference of the Methodist Episcopal Church will be held on Monday at 10 a.m. It is the West span, and the repairs will be made.

The March trial is to be held in the town of Dahlonega, said county, and the trustees of said College were granted an order renewing said College in Lumpkin County, said state nor violative of private property, but only to promote education and philanthropy.

The murder trial of Smith, who was shot and killed while trying to escape from the jail, has been adjourned.

The state has a little over one million dollars on hand, but it is not thought that this will be enough to pay all the expenses of the government.

The Hoxie's Pill's cure all liver ills, constipation, and all kinds of stomach trouble.
High Honors—World's Fair.

Despite the vast crowds and the excitement of the Exposition, Dr. and Mrs. Satterfield were able to make the most of their visit. They were among the first to enter the exhibition halls and were amazed by the marvels of science and industry on display. Mrs. Satterfield, in particular, was fascinated by the electric lights and the inventions that promised to change the future of mankind.

As they strolled through the halls, Dr. Satterfield pointed out various exhibits to his wife, explaining the principles behind each invention. Mrs. Satterfield was particularly interested in the demonstrations of electricity, which she found both fascinating and impressive.

One of the highlights of their visit was the opportunity to see the new telephone in action. Dr. Satterfield demonstrated how the device worked, and Mrs. Satterfield was eager to try it out. She made a call to her sister, who was waiting in the hotel lobby, and was thrilled to hear her sister's voice on the other end of the line.

Despite the cold and the long lines, Dr. and Mrs. Satterfield were determined to make the most of their visit to the Exposition. They spent hours exploring the various exhibits, taking in the sights and sounds of this remarkable event.

As they left the Exposition grounds, Mrs. Satterfield turned to her husband and said, "I've never seen anything like this before. It's hard to believe that all of this came from the minds of men."

Dr. Satterfield smiled and said, "Yes, it's truly a testament to the power of the human spirit."

With a final wave to the throngs of people gathered on the steps of the entrance, Dr. and Mrs. Satterfield made their way back to the hotel, eagerly anticipating the next day's activities.
Of course you understand that the shuck and ear, in the shook, as is done, is not worth much. The left over portions, in case of overproduction, serve us better than by calling attention to their quality of work done: Occasionally our annual rain fall of about 49 inches, the farmers of Virginia will, in our south end in cotton, with capacity, about 4,000 bales per annum. pitched their camp in Georgia and entered at the Dahlonega, Ga. R. P. O., as Atlanta the 23d inst., the survey, after which time a railroad to this little village are the Dahlonega railroad, which is on his trip to the boys at corn shucking, stood we are "just as big a man" as Gro.

the exposition to show himself to they are going to males an attack on the, is Barney Barnato. The wealthiest man now in the United States is Barney Barnato.

How the bankers are squirming to send him of his personal effects. This was doomed him to the gallows, Myers offered a reward of two hundred dollars for his capture.

How the women suffragists have fared the fight for their rights. The fight for women's rights is, that it is not so well organized as it should be. One of the most important elements in all successful movements is the active, enthusiastic participation of the masses. The women's movement has made great strides in recent years, with the passage of the 19th Amendment granting women the right to vote. However, much work remains to be done to ensure equal rights and opportunities for women. This movement is especially important in today's society, where gender equality and women's empowerment are becoming increasingly recognized as essential values.

The women's movement is not just about politics and policy, but about changing attitudes and beliefs. It is about challenging the stereotypes and expectations that have limited women's roles and opportunities for so long. It is about empowering women to take control of their own lives and to demand the respect and equality that they deserve. The women's movement is a powerful force for change, and its impact will continue to be felt for generations to come. It is a movement that everyone can support and contribute to, regardless of gender or background. Together, we can work towards a future where everyone has the freedom to live life on their own terms, without fear of discrimination or oppression. The women's movement is a call to action, and we must all answer it.
The paper to our patrons when it comes.

There is no '25c. corn in Dahlonega. It brings about 40c. per bushel. If you are not going to sell your corn at the court, it is r. porfed, sent a work order to the office of the Registers of Deeds. Such people are dangerous, and are to be dreaded.

There are no 'large order since becoming so corny, which caused premature death. It is a success as a boat, as it floats. Sick headache.

Bill Smith, formerly of this town, is an oddity, you know, and poor. A few days ago Frank Wheeler, dressed as a clerk, was sent to the station. He was landed in jail last Wednesday. Between the witnesses could not be found.

The new forge house recently erected under the management of Mr. Stappen, finished last Tuesday. It is as strong as a house, in fact stronger, and is used for raising purposes.

Make yourself strong. You would need your full strength.

The cost of silos varies from $5 to $50. Some attach much importance to the packing equally thorough, rapid and when the packing is not uniform, it may fail. The packing should be done by a good dryer. The silage should be kept level and well trodden. Some experts recommend putting a little dry hay or fodder and a little water. However, it seems most important to have satisfaction of feeding the stock, consequently it should be kept moist, or in other words, the silage should be well watered.

There is a growing demand for silage for our winter food for cattle. It is a good feeder, and does not require much labor. It is a good feeder, and does not require much labor. Some attach much importance to the packing equally thorough, rapid and when the packing is not uniform, it may fail. The packing should be done by a good dryer. The silage should be kept level and well trodden. Some experts recommend putting a little dry hay or fodder and a little water. However, it seems most important to have satisfaction of feeding the stock, consequently it should be kept moist, or in other words, the silage should be well watered.

"A new concern has been formed and is being properly attended to. The concern will have its home in the eastern and western parts of the country; and many interested growers will be benefited by it. The concern now contains a considerable amount of silage, and will be able to feed the stock to the best advantage. It should be done by a good dryer. The silage should be kept level and well trodden. Some experts recommend putting a little dry hay or fodder and a little water. However, it seems most important to have satisfaction of feeding the stock, consequently it should be kept moist, or in other words, the silage should be well watered.

Some attach much importance to the packing equally thorough, rapid and when the packing is not uniform, it may fail. The packing should be done by a good dryer. The silage should be kept level and well trodden. Some experts recommend putting a little dry hay or fodder and a little water. However, it seems most important to have satisfaction of feeding the stock, consequently it should be kept moist, or in other words, the silage should be well watered.
